

SRA International, Inc., a leading provider of technology and strategic consulting services and solutions to government organizations and commercial clients, is seeking motivated professionals in the field of security risk analysis. The position would focus on developing improved security risk analysis and data collection methodologies, as well as strategies for promoting security risk analysis across a range of stakeholders. The successful candidate will use their experience to plan, organize, and carry out analytical studies of complex security risk management problems, as well as plan and implement potential technical or programmatic solutions to these problems. Candidate will be called to analyze client's needs, available data, and the decision environment to optimize risk analysis methods for various policy, budget and strategic decisions. This includes developing and presenting risk analysis and risk management solutions for client approval. Analysis may be in the areas of homeland security, antiterrorism, intelligence, counterintelligence, physical assets, systems, infrastructures and information systems.

Founded in 1978, SRA is dedicated to solving complex problems of global significance for government organizations serving the national security, civil government and global health markets. Recognized by *FORTUNE* magazine as one of the Top 100 places to work for 10 consecutive years, SRA employs more than 7,000 people and serves clients around the world. Along with competitive salaries, SRA's comprehensive benefits package includes paid time off, tuition reimbursement for education and training, medical, dental and vision insurance, a 401(k) deferred savings plan with SRA contributions, employee stock purchase program and incentive and bonus programs.
